Learn to develop your song writing, composition and recording skills in this practical subject. Enhance your musical skills through many creative projects and demonstrate final projects through live performance in groups of all styles and genres, as well as recording and mixing within a studio environment.

This subject provides opportunities for students to understand how to create and manage real world projectsPg e

o

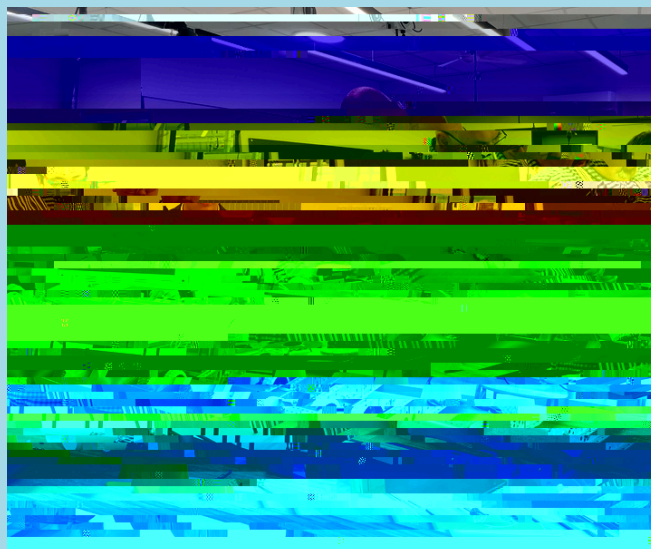

Technology

Design Technology – Food Studi

Digital Technology – Computing

Students investigate how digital systems represent text, images, and audio data in binary. They investigate how data is transmitted and secured in wired, wireless and mobile networks. They organise data using a database and manage projects using software. Students develop and modify programs using a programming language.

Handwriting practice lines consisting of two columns of horizontal lines. Each column contains four sets of lines, with each set consisting of two parallel lines. The lines are evenly spaced and extend across the width of the page.

Science – Forensic Science
